The SEEK License Agreement: Purposes and Pointers

The **purposes** of this License Agreement are:

1. To help ensure that the SEEK model is implemented as intended.
2. To obtain regular feedback from those implementing SEEK. This is valuable to continue improving the model.
3. To protect the SEEK copyrighted materials. We are however willing to work with those wishing to tweak the SEEK PQ-R. The SEEK Parent Handouts however *should* be customized with information on local resources.
4. To help us track where the SEEK model is being implemented.
5. To obtain modest fees from large practices and healthcare systems in order to help disseminate the SEEK model.

The following are a few **pointers** to help complete this Agreement:

Article 2: Enter the number of primary care professionals (MDs, DOs, NPs, PAs) who will be implementing SEEK.

3.2(a): Enter the state(s) where SEEK will be implemented. "Qualified sublicencees" refers to affiliated practices or clinics where SEEK will be implemented. It does *not* include different sites of the same practice.

3.2(b): Note the practice(s) information to be provided to the SEEK Project.

4.1: Feedback is required every 6 months during the 3-year term of the Agreement.
